

# Fabio Campos

(860) 372-0053 | [fabiocam@andrew.cmu.edu](mailto:fabiocam@andrew.cmu.edu) | <https://www.linkedin.com/in/fcamp0s/>

## EDUCATION

---

### Carnegie Mellon University

Pittsburgh, PA

Bachelor of Science in Electrical and Computer Engineering, GPA: 3.49

May 2027

**Relevant Courses:** Computer Systems, Distributed Systems, Full-Stack Software Development, Introduction to Machine Learning, Web Application Development, Parallel Computer Architecture and Programming, Principles of Software Construction

**Certifications:** CodePath Intermediate Technical Interview Prep (Advanced), Summer 2025

## TECHNICAL SKILLS

---

**Programming languages/ Software:** Python, Numpy, JavaScript, Node.js, React, TypeScript, SQL/NoSql, R, HTML/CSS, Linux, Git, Docker, MongoDB, Rest APIs, and Cloud infrastructure, C/C#/C++, Rust, Java

## WORK EXPERIENCE

---

### Software Engineering Intern, Microsoft

Redmond, WA

Microsoft - Azure Security

May 2026 - August 2026

- Built a secure proxy service connecting Azure SRE AI agents with internal infrastructure APIs, enabling on-call engineers to access real-time machine health, logs, repair state, and operational data without manual investigation across restricted systems
- Implemented cross-system authentication and authorization for protected internal services, configuring token-based access, service roles, and approval workflows to securely bridge identity boundaries between Azure and lower-level infrastructure systems
- Developed a reusable integration layer between Azure incident-response automation and lower-level infrastructure systems, reducing manual investigation steps for on-call engineers and enabling future teams to extend the integration

### Teaching Assistant, Carnegie Mellon University

Pittsburgh, PA

Fundamentals of Programming and Computer Science

August 2025 - May 2026

- Supported 200+ students in Python programming, algorithm design, and data structures by debugging code and reinforcing computational problem-solving skills, simulating real-world debugging workflows

### Full-Stack Software Engineer Intern

Pittsburgh, PA

MoonRanger - Mission Control

May 2025 - August 2025

- Improved the Mission Control web interface for over 20 operators by implementing features in React and TypeScript, enabling real-time visualization of rover status, command history, and live telemetry, reducing operator errors by 15%
- Resolved critical issues with coordinate conversions for lunar maps, increasing the accuracy of rover navigation paths by 20%, ensuring safer and more efficient mission operations

### Undergraduate Research, Carnegie Mellon University

Pittsburgh, PA

Python-Based Climate Risk Data Collection and Spatial Analysis

August 2023 - May 2024

- Created geospatial analysis tools visualizing data-driven insights highlighting regional climate vulnerabilities across Arizona

## PROJECTS

---

### Engineering OS

- Built an Engineering OS platform to centralize notes, GitHub activity, calendar events, and productivity workflows into a unified developer command center

### Multithreaded Web Proxy

- Designed and implemented a concurrent caching web proxy server in C, utilizing socket programming and Pthreads to manage real-time HTTP/1.0 client requests with memory caching and LRU eviction

## LEADERSHIP AND PROFESSIONAL DEVELOPMENT

---

### Management Leadership for Tomorrow

Career Preparation Fellow

January 2025 - Present

- Accepted into a professional development program for high-achieving diverse talent in software engineering
